# About Us

This is very important as internship programs provide comprehensive experience and knowledge to the students, giving them real and relevant work experience.

Hex Software is a leading software development company dedicated to fostering talent and innovation in various domains. With a strong commitment to excellence, we offer internship opportunities that provide hands-on experience in cutting-edge technologies and a dynamic work environment.

# About Internship

**HEX SOFTWARES**

INNOVATE | CONNECT | INSPIRE

- **Internship Offer Letter**
- **Job Opportunities/Placement Support**
- **Completion Certificate**
- **Resume Building**
- **Recomandation Letter**

# Instruction

- **Share your intern status on LinkedIn by mentioning @HexSoftwres**
- **Complete Assigned Projects within the mentioned period of time.**
- **Upload Your whole source code on GitHub by creating repository named HexSoftwares\_Project\_Name.**
- **Update your Project completion on LinkedIn with a video explanation and share the GitHub project repository link.**
- **You will be provided a weekly task and In a given time and have to complete that task and submit via Submission form .**
- **You will be provided Two - Four task in all domains but you have to complete only one in your domain (Select One Task).**

# DATA SCIENCE

## Project List

This Internship program focuses on providing you with hands-on experience in Data Science.

This project will help you gain hands-on experience with data preprocessing, model development, and performance evaluation—key skills in the field of data science.

# Project :- 1

## Portfolio Project Walkthrough (Kaggle Titanic).

- It is a classic introductory data science challenge that involves building a predictive model to determine which passengers survived the Titanic disaster.
- Gain experience in data cleaning, feature engineering, and applying ML algorithms to create a classification model.
- It will develop skills in Python programming, exploratory data analysis (EDA), and model evaluation using libraries like pandas, numpy, and scikit-learn.

Example :- [Take Help](#)

# Project :- 2

## Covid-19 Data Analysis Project using Python

- The Covid-19 Data Analysis Project using Python involves collecting and analyzing real-time data on Covid-19 cases, recoveries, and fatalities from various sources.
- It utilizes libraries like Pandas, NumPy, and Matplotlib for data manipulation, cleaning, and visualization.
- The project aims to identify patterns, trends, and correlations in the data, such as the impact of vaccination rates or lockdown measures on the spread of the virus.

Example :- [Take Help](#)

# Project :- 3

## Building a YouTube Data Dashboard with Streamlit

- **Develop a YouTube Data Dashboard using Streamlit to visualize and analyze key metrics like video views, watch time, subscriber growth, and engagement.**
- **Features:** Include interactive charts and graphs, such as bar charts for top-performing videos and line graphs for subscriber trends.
- **Integration:** Use the YouTube Data API to fetch real-time data and Streamlit widgets to allow dynamic filtering and exploration.

# Submission Details

- You will have to provide task submission for each task(weekly task)
- It's essential for each intern to complete all the assigned tasks. If someone completes only one or two tasks, their internship may be considered incomplete or certificate will not be provided, So Please make sure to fulfill all the tasks assigned to you and submit in Submission form to ensure a successful Internship.
